

PRASANNA V

Python Developer & AI/ML Enthusiast

📞 7550267750 ✉️ prasannav54321@gmail.com 🔗 linkedin.com/in/prasanna-v24
📍 Chennai, Tamil Nadu, India

SUMMARY

A BCA graduate (2026) and results-driven Python Developer with a strong interest in AI and Machine Learning. Possesses hands-on experience in machine learning, automation, and software testing. Skilled in developing Python-based applications, debugging software, and analyzing datasets, along with practical knowledge of embedded automation systems. Aims to apply technical expertise in Python development, AI, and software engineering to contribute to innovative and challenging projects.

EXPERIENCE

Python Programmer

Chase Technologies

03/2025 - Now

Company specializing in technology solutions and automation

- Developed 5+ Python automation scripts to streamline repetitive workflows and improve operational efficiency
- Reduced manual processing time by approximately 30% through automation and code optimization
- Performed debugging, testing, and issue resolution for software applications, improving system reliability

Technical Head

Mathelets Club, S.A. College

01/2024 - 12/2025

Student-led organization focusing on technical skills development

- Organized 10+ technical workshops, coding events, and student innovation sessions
- Mentored 50+ students in Python programming, project development, and technical problem-solving

EDUCATION

Bachelor of Computer Applications (BCA)

S.A. College of Arts and Science

📅 08/2023 - 05/2026 📍 Chennai

Higher Secondary Education

Kalaimagal Matric Higher Secondary School

📅 01/2023 - 05/2023

KEY ACHIEVEMENTS

IoT-Based Smart Healthcare Wristband Presentation

Presented an IoT-Based Smart Healthcare Wristband at Vallal P.T. Lee International Conference

- **Project Demonstration at Rajalakshmi Engineering College**

Demonstrated project solution at Rajalakshmi Engineering College

SKILLS

Gmail	GitHub	Python	IoT
OpenCV	Pandas	Numpy	
Scikit-Learn	Git	C/C++	Java
Deep Learning	Jupyter Notebook		
Raspberry PI	Unit Testing		

PROJECTS

IoT-Based Office Automation System

IoT-Based Office Automation System

- Built a smart office automation system using Python, OpenCV, and MediaPipe for face recognition and attendance tracking
- Integrated IoT modules with sensors for real-time monitoring, access control, and automation
- Improved attendance accuracy and reduced manual tracking effort

Line Follower Robot

Line Follower Robot

- Developed an autonomous robot using embedded sensors and real-time navigation algorithms
- Implemented path-tracking logic for accurate movement and obstacle handling
